Uni(We)Lab   webuild

Hackathon UniWeLab
New Sopraelevata

15 and 16 // SEPTEMBER // 2021

UniWeLab Hackathon is a call for ideas in order to find innovative, creative and intelligent views on the future of Genova. Students, research fellows, PhD students from UniGe Departments will have the opportunity to share and develop innovative ideas on sustainable development of the Sopraelevata infrastructure. The main focus would be on how the Sopraelevata could become a sustainable infrastructure through innovative, responsible and dynamic proposals, thus reducing negative externalities, and balancing ecological and economical resilience, social and cultural aspects. The main goal is to re-think Sopraelevata infrastructure in terms of different ways to use it or in terms of making it more efficient and contemporary in case a new submarine tunnel would be built. How could the Sopraelevata become a global "best practice" and represent an opportunity for the whole city?

**THE ADMISSION WILL START AT 10.00 AM
IN AULA MAGNA, VIA BALBI 5, GENOA**

DAY ONE

h/10.30
