Corso di Perfezionamento Cerimonia Finale

20 // NOVEMBER // 2025

The first edition of the Advanced Course in Project Management of Large Sustainable Infrastructures is coming to an end. After a year of specialised lessons, site visits and presentations by Webuild professionals, the students on the course will present the results of their project work through a new series of short podcasts. If you are intrigued by the world of major construction projects, if you want to learn about the opportunities that UniGe offers its students, if you want to begin to discover the complex reality of a multinational company such as Webuild, we look forward to seeing you at the Final Session. The aim of the day will be not only to reward students who have distinguished themselves through merit during the year, but also to highlight the opportunities offered by the course and involve new students in UniWeLab, the collaboration between UniGe and Webuild.

**THE ADMISSION WILL START AT 09.00 AM
IN AULA MERIDIANA, VIA BALBI 5, GENOA**

h/09.00

OPENING

Ilaria Delponte - UniGe

The course coordinator begins the closing ceremony by introducing the participants and students. A video is shown describing the course activities.
